

THE CYCLE SHOW 2013 PUMP TRACK DESIGN COMPETITION

with:
DMR BIKES
and:
CTC MTB

Mountain bikers, here a chance to turn your fantasy trail design into reality.

If you ride at your local bike park and you reckon you could have come up with some better 'berms' and 'rollers' then have a go at designing your own.

CTC, the national cycling charity's MTB trail consultancy team has linked up with Urban Design Specialists DHUD, DMR Bikes and the Cycleshow, the UK's number one cycling exhibition to capture your ideas and potential opportunities for the development of a Pumptrack.

The winner will ride away on a **DMR Wrath Bike** the ultimate in Pump track bikes together with seeing their design turned into a

professional pump track plans by the Urban designers at DHUD. The winner will also get to meet competition judge star rider DMR's **Olly Wilkins**.

All you need to do is put your design down on paper by completing the entry form and send it to us at the address on the form by 5pm on Monday 23rd September or hand delivered to the CTC stand at the Cycleshow.

Parts of the winning design will be incorporated into the CTC Bike Park Network at the Lovell Jumps and Pumptrack site in Milford, Surrey.

Every entrant will get free entry to the Public Days of the Cycleshow from the 27th to 29th September at the NEC in Birmingham.

YOUR PUMP TRACK DESIGN:

Use the space below to draw your track from scratch or cut out elements from the next sheet to piece together your pump track design.

Think about the flow of the track, how the various elements that you're designing fit together and how people of different abilities will ride the track and improve their skills.

Think about the constraints of the site eg. which way the slope goes, how you can get to the track and the location of things like a start ramp.

Photos help as well. If you send these in, write your name and address and the location on the back.

PUMP TRACK ELEMENTS:

Cut out the pieces below and use them to piece together your Pump Track design on the previous sheet.

If you want to adapt elements or create more copies, go ahead. Be as creative as you can! Have a look at the CTC website where you can download examples of other Pumptrack designs
